Donghua University

In 1912, a famous industrialist in Chinese history founded the predecessor of current Donghua University – Nantong College, and it formally became an academic institute of textile science and technology in 1951. In 1985, the institute was renamed as China Textile University.

With its development in the next several decades it has grown as a public multidisciplinary university directly under the Ministry of Education of China and one of the Project 211 universities. Before stepping into the new century, the name was changed to Donghua University (hereinafter referred to as DHU).

Academic Excellence
The academic and scientific research at DHU are based on textile, materials & design, and actuated by innovation. In the national academic evaluations of all first-level disciplines, Textile Science & Engineering ranks No. 1 for several consecutive years. The engineering related discipline in ARWU ranking is among the Best 150. Research achievements have found applications in the fields of aviation and aerospace, military, construction, environmental protection, new materials, etc.

Scholarships Opportunities
As early as 1954, DHU commenced to accept international students who were among the first group of oversea students enrolled by Chinese universities. It has been appointed to accept international students either with Chinese Government Scholarship or Shanghai Government Scholarship. Besides, DHU sets up ‘Outstanding International Student Scholarship’ to encourage excellent enrolled international students.

Talents Cultivation
DHU is committed to developing interdisciplinary talents with solid theoretical foundation in their study fields and broad international perspectives, so that they can adopt their knowledge and abilities by developing integrated understanding of the industry's present and future, and have strong competitive advantages in relevant careers and positions. DHU also puts efforts to, with providing systematic Chinese language courses, cultural lectures and exchange activities, enable international students to embrace the Chinese culture and society more fully and become international talents with multicultural background. International postgraduates who attend English-taught programs are required to acquire HSK Certificate (at least level 3) when graduate from Donghua University. After completing the study tasks according to the school regulations, and passing the course examinations and thesis defense, students will be awarded graduation certificates. For those who meet the qualification requirements will be awarded diploma certificates.

Visiting Chinese Enterprises Program

This program was initiated in 2015. Professors from different academic schools take a group of international students to visit the local enterprises 3 to 4 times per semester. In-depth visits help students learn the practices of operation, production and technology application in the related industry development.

Internship & Practice Base

Since 2009, Donghua University has cooperated with more than 100 companies and organizations to offer internships or practice opportunities for international students. Now, more than 30 of them have become the ‘Donghua University International Student Internship Base’.

Conference & Competition

With the encouragement and facilitation from their supervisors, international students broadened their horizons, enhanced academic capacities, and widened interpersonal connections by attending the related conferences and competitions.
The international Student Association (ISA) is made up of international students and represents the interests of international students enrolled at Donghua University. We welcome you on campus, settle you in, entertain you, support you and make sure you have an amazing time while studying here in Shanghai, China.

Back to the point, I am really honored to be one of the recipients of CSC Scholarship. Donghua is no doubt an educational institute with highly experienced teachers, labs equipped with latest testing instruments and a giant library to quench the thirst of book lovers. Being far away from home, I was feeling a sense of loneliness when I landed in China for the first time, however soon I realized that it’s just like my own home. DHU has a very big international students’ family lodging, studying, enjoying, sharing culture and food together. Different student organizations set by the university, are really doing great by arranging get together, parties, trainings, trips, volunteer work and many more. Donghua University doesn’t enrich the students only with the knowledge inside the classroom rather it provides chance to do internships, industrial visits, workshops etc. as well. In short Donghua is like a heaven for those who intend to study, learn and enjoy. Love you DHU. Thanks China.

Life is full of surprises and you never know how things will turn out. I still remember how I felt when I received the admission notice from Donghua. Time flies, I’ve been in Donghua University, Shanghai for the seventh year. The advantage I can speak fluent Chinese makes me adapt to the study and life here faster. Therefore, I joined ISA and RA of ICES to help international students who have just arrived Shanghai and also organizing events and activities, such as sports activities, talent competition and more. ICES also offers many practical opportunities and activities for students to contact and understand Chinese culture. In addition, ICES also organize language excursion activities to visit the other places, besides enjoying the scenery, it provides the best opportunities to learn, to know, and to understand the local life.

China has a saying, “rely on parents at home, rely on friends outside.” I’m grateful to my family, teachers, friends, classmates for their help. My life is getting better because of you all. I appreciate the opportunity given by DHU, I’ve learned a lot. Thank you Donghua.

In my undergraduate program I studied Regional-studies China and spend two years in Beijing, learning the Chinese language. After a gap year in Russia, I finally made my way back to China. Donghua University is located in the heart of Shanghai and is a great place to engage in business related studies. The campus is modern, has a friendly atmosphere and is equipped with sport facilities. Teachers are highly qualified with most possessing an international education background.

In my master course, we are 13 students from 12 different countries. This allows for a vivid exchange of ideas and a widening of your cultural horizon. In class, we do not only focus on academic issues but also on the practical aspects of business, which is crucial for a MIB student. We visit companies and learn how business is conduct in various fields, with a special focus on China and international exchange. Apart from an academic life, Donghua offers countless activities that you can take part in. It never gets boring around here, come and join us!
